NEW DELHI 3 (INDIA);  
The 24th Oct., 1949.

K. MITRA,  
for Registrar General, India.

NATIONAL

SAVINGS

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (or after 12 months). The 5 and 7 years certificates can be encashed at any time.

Certificates are obtainable in denominations of Rs. 1,000 and 5,000 and you can invest up to Rs. 10,000 (or Rs. 5,000 if you hold less than 10 certificates held).

They are obtainable from all post office, District Savings Officer, Assistant National Savings Officers, National Savings Officers or from the National Savings Commissioner, Simla.

TOGETHER WITH A MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 17th September, 1949.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 17th September 1949 relate to 162 towns with an estimated population of 21,103 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 76% of the total number of towns representing 81% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,369 and 8,777 representing birth and death rates of 37.9 and 21.6 per thousand of population respectively.

(A) *Provinces.*—The data here relate to 151 towns with an estimated population of 19,677 thousands. Information for Bihar and Assam could not be included. The total number of towns is 189 and their population is 23,320 thousands. Thus 80% of the total number of towns representing 84% of the total population is covered. The numbers of births and deaths recorded in these towns were 14,674 and 8,288

representing birth and death rates of 38.8 and 21.9 per thousand of population respectively. The table at the end gives the position by provinces. The towns of Nadiad in Bombay and Hathras in U.P. recorded high death rates of 60.4 and 59.4 per thousand of the population respectively. In both these places the proportion of deaths from fever was quite considerable.

(B) *Unions and States.*—The data here relate to 11 towns with an estimated population of 1,428 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 46% of the total number of towns representing 54% of the total population is covered. The numbers of births and deaths recorded were 695 and 489 representing birth and death rates of 25.3 and 17.8 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of the population.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 24th September 1949, relate to 110 towns with an estimated population of 14,368 thousands. The total number of towns is 213 and their population is 26,241 thousands. Thus 52% of the total number of towns representing 55% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 11,353 and 6,304 representing birth and death rates of 41.1 and 22.8 per thousand of population respectively.

(A) *Indian Provinces.*—The data here relate to 96 towns with an estimated population of 12,658 thousands. Information for Madras, West Bengal, Bihar & Assam could not be included. The total number of towns is 189 and their population is 23,618 thousands. Thus 51% of the total number of towns representing 54% of the total population is covered. The numbers of births and deaths recorded in these towns

were 10,413 and 5,728 representing birth and death rates of 42.8 and 23.5 per thousand of population respectively. The table at the end gives the position by provinces.

Sambhal in U. P. was the only town which had a high death rate of 50.3 per thousand of the population and this high death rate was to a considerable extent due to deaths from fever.

(B) *Unions and States.*—The data here relate to 14 towns with an estimated population of 1,710 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 58% of the total number of towns representing 55% of the total population is covered. The numbers of births and deaths were 940 and 576 representing birth and death rates of 28.6 and 17.5 per thousand of population respectively. No town recorded a death rate of 50 or over per thousand of the population.
